

40ft Domino Type (17) with well deck for logs

The Type 17 is called the Log-Rac, being a purpose built ruggedised flatrack for the carriage of logs, pipes and timber. These are containerized within the well formed in the base and adjustable stanchions along each side.

The stanchions can be folded down across the well to form a flat level superstructure to support general cargo.

This patented flatrack has gooseneck tunnel at each end and could be adapted to carry flexible tanks within the base for water and fuel.

Worldwide Spare Parts

As worldwide leaders in flatrack technology, the all important spare parts are available as they have been for more than 20 years.

Patents

Please do not encourage copying of the patented structures and components.

Typical Lashings and Interfacing

Stanchions:	8 per side adjustable
Lashing bars:	6 per side, 2 per end
Fork pockets:	115 x 360mm
Twistlocks:	1 piece forged lift element, 30° stainless steel detent
Header locks:	2 per end semi-automatic
Corner locking:	hammer locked conical pin
Counterbalancing:	leaf spring
Approvals:	ABS, LRS, BV, UIC, CSC, TCT

Typical Dimensions

External	mm	ft	in
Length	6058	19'	10.5"
Width	2438	8'	0"
Height	2591	8'	6"
Folded	648	2'	1.5"

4 into 8ft6in

Internal	mm	ft	in
Wall panel to panel	12050	39'	6.5"
Width stanchions down	2280	7'	5.8"
Width between stanchions	1980	6'	6"

Typical ratings	kg	lb
Tare weight	5000	11000
Payload	35000	77160
Gross	40000	88160
Load over 2m	20000	44092
Stacking	7 high at 30480kg	

The Flatrack Features

- Ship logs, pipes and steel bars securely
- Ship logs forest to door
- Eliminate 90% of handling & damage
- Move logs safely
- Spare parts available worldwide
- Available for leasing
