

20ft Domino Type (5) with open goal post end frames

The 20ft Type (5) folds seven into 8ft6in module. It features a 'goal post' end, which is an open frame to enable its use with certain cargo projecting through the ends.

The flat can be used as a bolster when the end frames are folded flush with the floor. A special feature of the Type (5) (and (4)) is the lashing beams which are unique to CSA flatracks and are essential for the Type (5) because of the need for additional longitudinal cargo securing.

The end walls can be mixed easily with the Type (4) and walls are removable for vehicle loading.
