Relocatable Aircraft Hangar (RAH)

Sea Box’s Relocatable Aircraft Hangar (RAH) provides a durable, reliable and efficient shelter to support aircraft operations.

Ease of Setup
The shelter frames have a Patented collapsible design which simplifies set up. The end frames remain attached to the floor and roof of the shelter during transport. When the roof is lifted during deployment, the end frames slide into place creating a solid structure. Wall panels are then positioned in channels around the perimeter and are bolted into place.

Fully Redeployable
The key feature of our RAH family of products is its ease of disassembly, pack out and transport for redeployment. Sea Box’s RAH can be disassembled and fully packed out on seven flatbed trailers for domestic transport or into eight 40’ high cube ISO containers for overseas shipment.

Base Model Key Features
• Shelter can be fully erected in a matter of days on slab or footings. (10) Days on site
• Walls and ceiling panels consist of a galvanized steel exterior and perforated steel interior with a core made of non-combustible structural mineral wool for superior insulation and noise absorption.
• Wall panel design is water resistant and durable for relocation, pack up and shipping.
• Insulation R value of 21.
• Shelter comes equipped with two 7.5 ton ECU.
• Plug and Play electric.
• LED interior and exterior lighting.
• One piece hydraulic, overhead, high power door system
• Electrical system includes wiring for power monitors, phase sequencing, utility power, and Emergency Power-Off (EPO) switches.
• Main power 200A, 3-phase panel, 50/60Hz. / 400Hz. equipment available (option)
• Fire, smoke, and heat detection system in accordance with NFPA regulations.
• Communications Interface Panel.
• Wind load rating 200 mph. Snow load rating 80 psf.
• Rubber tile or polyurea floor coating throughout

Priced at a fraction of the cost of permanent structures.
