IWS®

INTERMODAL WAREHOUSE SYSTEM®

The Most Versatile & Cost Efficient Intermodal Shipping Solution on the Market Today.

WHAT IS INTERMODAL WAREHOUSE SYSTEM IWS®?

What is the Intermodal Warehouse System (IWS®)?

Quite simply put, it's the most versatile & cost efficient intermodal shipping solution on the market today.

The IWS® doubles as a cargo carrying platform and field warehousing structure, available in multiple sizes and stackable configurations. It improves the efficiency of your supply chain while delivering exceptional cost savings.

Delivers Quantifiable Cost Reductions:

Reduce Indirect Labor Hours: 50-70%

Reduce Material Handling Equipment: 50+%

With the IWS® you can turn cluttered lay down yards, job sites, and ports into efficient warehouses, keeping your goods organized, reducing storage space and improving your inventory process. These efficient lay down yards and workspaces are safer for workers in a wide range of industries from oil and gas to construction. IWS® eliminates the need for workers to spend time inside shipping containers.

The IWS® also maintains the quality of your expensive goods, keeping them damage free during shipping and best of all, loading the IWS® couldn't be easier. The system securely slides into ISO shipping containers to simplify the transportation process. It's truly an intermodal solution capable of accompanying your shipping container throughout its entire journey.

IWS®: Improve Efficiency, safety, and quality, while reducing your costs.

20' & 40' INTERMODAL WAREHOUSE SYSTEM (IWS®) PALLET

(Pictured: 20' IWS® in desert tan, 40' IWS® in orange)

20' IWS® Pallet SB9121.210

- The 20' IWS® pallet can be stacked and loaded using IWS® legs up to 3 high for transportation, potentially tripling shipping capacity for highway transport outside shipping container
- These pallets can be stacked empty 10 high inside a 20' ISO Container for repositioning
- These pallets can be stacked up to 9 high using IWS® legs for warehousing or stacked up to 20 high when not in use

40' IWS® Pallet SB9140.425

- The 40' IWS® pallet can be stacked and loaded 2 high for transportation, potentially doubling shipping capacity
- These pallets can be stacked unloaded 4 high inside a 40' ISO Container
- These pallets can be stacked up to 9-high for warehousing or nested up to 15-high when not in use

4' & 10' INTERMODAL WAREHOUSE SYSTEM (IWS®) PALLET

4' IWS® Pallet **SB9104.041**

10' IWS® Pallet **SB9110.105**

- These pallets are able to be stacked empty 10 high inside a 20' ISO Container
- These pallets are able to be stacked up to 4 high using IWS® legs for warehousing or stacked up to 20 high when not in use
